

# How to Use arxiv Class

Saber<sup>\*</sup>

Archer<sup>†</sup>

Lancer<sup>‡</sup>

Rider<sup>§</sup>

November 8, 2017

## Abstract

This article gives you a clear view of how to use the arxiv class to provide high quality L<sup>A</sup>T<sub>E</sub>X submission for arXiv. arxiv is a simple extension of `article.cls`. This document is an example provided using arxiv class.

## 1 Introduction

The motivation of creating this L<sup>A</sup>T<sub>E</sub>X class is to make life simpler when dealing with arXiv submissions.

## 2 Class Options

All options work for `article.cls` also work for this class. For example,

```
\documentclass[10pt]{arxiv}
```

---
